

XM Radio is a service I pay for. the National Association of Broadcasters should have no input as to the services I pay my hard earned money for. What are they going to do next, limit cable television, the internet, and Pay-per-View movies all because they can't deliver what the public really wants and pays for. I am an Over The Road trucker and I heavily depend on the traffic and weather channels available on XM Radio. Sure I could surf the radio to find local traffic and weather in each and every city I go through on my varied routes. It is very distracting trying to find pertinent stations just when I need to hear traffic and weather information, all while herding an 18 wheeler through very crazy traffic at rush hour. I creates an extremely dangerous situation both for me and the drivers around me. That's why I subscribe to XM Radio. It gives me the information I need when I need it whthout all the fuss and distraction. Please do not let the NAB further restrict my rights as a citizen to listen to what ever station I choose, even when I am paying the bill.
